

DATA SHEET // OBSD PROPELLERS

When it comes to Outboard and Sterndrive (OBSD) propellers Michigan has one goal – to produce the finest product possible, whilst at the same time maintaining the highest standards of quality. Since 1903 we have been introducing new props and improving old ones. An undeniable history with unmistakeable performance.

MMP

MICHIGAN MARINE PROPULSION
INTERNATIONAL

All Michigan propellers are manufactured with particular emphasis on tolerance specification and on the philosophy that quality is the cornerstone of economic growth and stability.

SUPPORT & SERVICE

Our aftermarket OBSD propellers are sold globally via the world's largest factory authorised network of dealers and distributors.

From Australasia, through Asia and the Indian sub-continent into the Middle East, onto Europe, Africa and Scandinavia we have a dealer in place to service you. In the USA, Canada, Central and South America we have a comprehensive network of distributors and authorised repair stations ready to service a Michigan OBSD propeller.

Inventory levels are strategically positioned in worldwide locations enabling us to react to and support customer needs and requirements.

APPLICATIONS

The Michigan offering is a complete line of aluminium and stainless steel replacement propellers for Outboard and Sterndrive applications.

Ballistic Propellers feature characteristics similar to racing style propellers. Ballistic Propellers are the ultimate performance propellers.

Michigan Match Propellers feature OEM blade geometry and are suitable for a wide-range of applications.

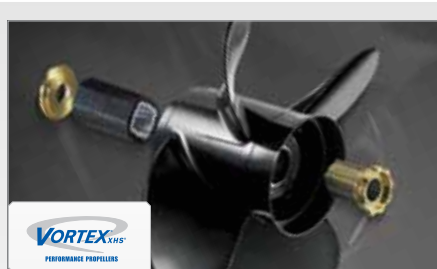

Apollo Propellers are the ideal general use stainless steel propellers and the Vortex is a high performance aluminum propeller, both series utilizes the XH5 hub system.

- NAVAL brass spindle with rubber cushioned hub absorbs impact
- Great primary prop priced as a weekend-saver spare
- Improved powder coating and beefier bushing
- Perfect aluminium replacement propeller

- Highly polished, ultimate performance stainless steel propeller
- Available as 3 or 4 blade propeller
- Can be utilized on most outboard and sterndrive applications
- 4 blade design improves hole shot on heavy loads and in water sports
- Performance CAD design blade geometry

- High performance aluminium utilizing XH5 Hub System
- Available as 3 or 4 blade propeller
- Features performance blade geometry, precision balanced blades and high gloss powder coat
- 4 blade option ideal for towing skiers, tubers, knee and wake boarders
- Great boater's choice for replacement or spare

- Tapered leading edges minimizes drag
- Blade tip and cup combine to improve bite and reduce power losses from cavitation
- Performance characteristics of racing style props
- Maintains optimum blade strength and thickness
- Highly cambered blade provides higher speed and better bow lift
